

Christian W. Schaumann

Notes:

*Legal Interception in
Telecommunication from a
technical perspective*

The presentation shall give a basic overview over the technical possibilities of legal interception in telecom networks with a focus on mobile networks.

After a description of the network- and legal interception architecture, I will describe the possible results of legal interception measures as well as its restrictions.

Finally a short outlook on the upcoming technical developments towards next generation (mobile) networks shall complete the picture.

Dr. Christian W. Schaumann LL.M. is with T-Mobile Austria GmbH since 2000.

After handling general legal issues, he is since June 2006 Vice President „Regulatory&Public Affairs“ including the team „Legal Interception“ of T-Mobile Austria GmbH, with focus on

- Competition and antitrust law, especially sector specific competition law
- General regulatory topics, e.g. frequency trading
- General legal advice, especially regarding Wholesale Marketing
- Public Affairs
- Legal Interception
